Supplementary Fig. S2. Immunocytochemical analysis of GFP in ST-GFP expressing NPP1 over-expressing cells. Panel "A" represents the relative area analyzed of the indicated compartments (Golgi (*n*=3), plastids (*n*=5) and "other compartments" including cytosol, vacuoles and cell wall) in three cells. "B" represents the number of gold particles identified in every compartment. "C" represents the density in arbitrary units of the labeling (particles/ μm^2) in every compartment.
