This work aims to study the regime of bankruptcy and other circumstances related with it. It is a very common topic in current regulations, and it has the purpose to deal with unusual situations where creditors’ claims are satisfied. There are exceptions where the bankruptcy can generate controversies.

Also, in order to carry out these executions it will be necessary to take into account the specific characteristics of each case.

We will see many flexible mechanism where the judge plays a very important role because he decides which objects are essential to continue the activity.
