		Abstract (laburpena 100:250 hitzetan)
Inglés (obligatorio) Ingelesa (nabiltaszkoa)	<p>This paper will provide information on the situation of renewable energies in the Autonomous Community of Navarre; Starting with the concept of renewable energy, giving a brief review of the evolution of clean energies throughout history and making an exhaustive analysis of the sector in our community, highlighting the key figures: generated employment, turnover, agents, as well as a detailed report of each type of renewable energy.</p> <p>The motivation for the realization of this work comes from the growing concern for our planet, despite the advances that have been done in this field until today, there is still a long way to go if we want to make Earth a sustainable planet that future generations can also enjoy.</p> <p>The Autonomous Community of Navarre is considered a pioneer in the sector at the state level; this aroused my curiosity to investigate the factors that have led us to this situation.</p>	
	<p>Renewable energies, primary sources, energy efficiency</p>	
		Galak edo hitz gakoak (gehienez 5)
