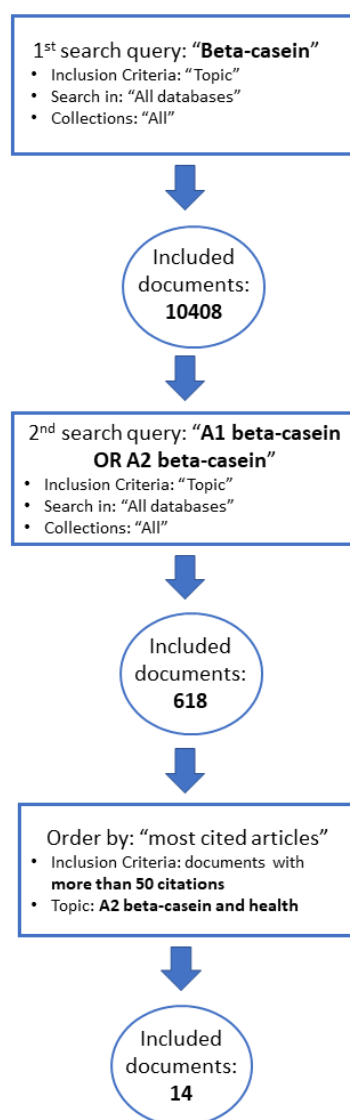

Figure S1. Methodological flowchart accomplished in this scientometric analysis.

Table S1. Top 10 most cited articles on A2 β -casein research field.

Number of cites	Title	Year	Affiliation	Funding agency	Document type	Reference
258	<i>Isolation and structural analysis of antihypertensive peptides that exist naturally in Gouda cheese</i>	2000	Univ. Tohoku (Japan)	-	Article	[1]
230	<i>Anti-inflammatory mechanisms of bioactive milk proteins in the intestine of newborns</i>	2013	Univ. Copenhagen (Denmark)	Strategic Research Councils	Review	[2]
214	<i>Substrate-specificity of cyclic AMP-dependent protein kinase</i>	1975	Univ. California (USA)	-	Article	[3]
200	<i>Effects of milk protein genetic-variants on milk-yield and composition</i>	1984	John Curtin School of Medical Research (Australia's national medical research)	-	Article	[4]
200	<i>Differential staining of phosphoproteins on polyacrylamide gels with a cationic carbocyanine dye</i>	1973	National Cancer Institute, NCI (Maryland, USA)		Article	[5]
177	<i>Polymorphism of bovine beta-casein and its potential effect on human health</i>	2007	Univ. Warmia (Poland)	-	Review	[6]
165	<i>Association of genetic-variants of casein and milk serum-proteins with milk, fat, and protein-production by dairy-cattle</i>	1984	McGill Univ. (USA)	-	Article	[7]
159	<i>Effects of milk protein variants on the protein composition of bovine milk</i>	2009	Univ. Wageningen (Netherlands)		Article	[8]
151	<i>STAT5A-deficient mice demonstrate a defect in granulocyte-macrophage colony-stimulating factor-induced proliferation and gene expression</i>	1997	FDA (USA); National Institute of Diabetes and Digestive and Kidney Diseases, NIDDK (USA)	-	Article	[9]
136	<i>Type I (insulin-dependent) diabetes mellitus and cow milk: casein variant consumption</i>	1999	Univ. Auckland and New Zealand Dairy Research Institute (New Zealand) and Univ. Düsseldorf (Germany)	-	Article	[10]
