	<p>The Kangaroo Mother Care (KMC) offers the opportunity for the newborn “return again” with prenatal those stimuli naturally, avoiding any break up with the mother^{2,3}. Therefore, it is necessary to develop and promote the MMC to stimulate the early skin-to-skin contact with the mother since the childbirth and in the following months. Carrying out this method, the hospital stay of the newborn and the mother is reduced, the mother-child relationship is enhanced as well as breastfeeding and early cognitive development, this has been demonstrated by a large number of researches^{4,5}.</p> <p>There are several researches of KMC, to say that the quality of the evidence regarding the kangaroo method is good so, it should be strongly recommended⁶. There is also another dimension of common sense that we can not forget, feelings and human values, which is not seen in systematic reviews or meta-analyses, it's the love that a mother can give to her child. </p>
