	<p>This paper is a research about the tecniques used in Largoiko SLL., a company dedicated to the desing and manufacturing of special machines. The research evaluates the possibility of including four improvements: a production based in CAM (Computer Aided Manufacturing), a control of the production, a Decalogue of good practices and a control of the material stock and tool stock.</p> <p>To evaluate those improvements a statistical study has been done. This statistical study is about the type of pieces mechanized in Largoiko and the time they took to do it. Also, with this information the benefit of a hypothetical 2014 has been calculated.</p> <p>In conclusion this thesis is wanted to be a reference for the lot of companies similar to Largoiko to improve their production and with it, their efficiency.</p>
