	<p>The study focuses on the windmill sector and more precisely in Wind Energy. The main objective is to study the opening of a new company in México. Recently, it has considered that in this country there is an enormous and potential energetic market. In order to support the decision of the company with real data, an opening project of a company has been performed. Therefore, coordinating all aspects of an opening project of a company is essential for a correct start in every company. It requires to look for new contacts, for example new clients and new suppliers and the location of the new company must be strategically done. Wind Energy belongs to the repair and maintenance of wind turbines industry and it has to operate quickly and with quality on their services if it wants the client satisfaction.</p>
