Inglés (obligatorio) Ingelesa (nahitaezkoa)	Abstract (resumen de 100-250 palabras)		Abstract (laburpena 100-250 hitzetan)		
	<p>The purpose of this Final Degree Project is to study the improvement of the competitiveness of the company Solidus Videcart, through the implementation of the Lean philosophy. The objective of this philosophy is based on the elimination of everything that is not useful in the production process of the company.</p> <p>The scope of this project covers the productive scope, design and management system of some sections that make up the company.</p> <p>By incorporating a database application, the records of the coils arriving from the San Andrés factory are computerized. In addition, thanks to the product design and the incorporation of Lean Manufacturing tools in a specific area of the plant, it is possible to simplify and speed up the daily work saving time and human talent losses.</p> <p>Likewise, it is a project that has immediate continuity because the objective is to continue with the Lean process in all areas, both areas and departments. Finally, the continuation of a change of mentality in all workers of the company is pursued.</p>
